

**MOPASSOL**  
**Movimiento por la Paz, la Soberanía y la Solidaridad entre los Pueblos**

**Buenos Aires call for Peace**  
**Let us embrace dreams of peace. Let us embrace de Agreements**

**Because** nothing human is alien to us, and any injustice being against anyone in the world moves us.

**Because** we can not remain indifferent facing the persistent and dark strategy carried out by the lords of war and enemies of peace, who have been trying to discredit the Peace Agreements signed in La Habana between FARC and Colombian government.

**Because** since de Peace Agreements were signed, more than 120 social leaders have been murdered.

**Because** is FARC's transition to became a political party, in the territorial space of education and reinstatement the agreed social developments plans and programmes have not yet been implemented.

**Because** the delay in Works of adaptation of the Zones of Normalization accentuates, and there is an absence of the institutions for developing educational an economic plans for the ex-combatants.

**Because** the one time commitments in allocation of normalization, the 90% basic income of a minimum wage for 24 months to those ex combatants who do not have en income generation contractual link, and the support to individual or collective production projects have not been fulfilled.

**Because** the absence of the agreed educational programmes delays the social and economic reintegration of the ex combatants.

**Because** there is no work with a gender perspective to achieve a real equality among men, women and LGTB people. Neither is recognized that women (peasants, natives, afrodecendents, and children) have been specially affected by poverty, violence and forced migration.

**Because** peace of all people must be a constant search, where the non-violent conflict management is inspired by Martin Luther King's words: *True peace is not merely the absence of tension, it is the presence of justice.* In a complex world, facing new and old situations, conflict is not the opposite of peace. The question is to process and change it through dialogue and negotiation with respect for International Law.

**Because** in these turning points in Latin America and the Caribbean, the peacebuilding in Colombia is a milestone in human history in the search for a better world.

We manifest for:

- Raise justice as a universal value for peace. Respect and value International Law, regarding interest of all the people, not only the most powerful.
- Hoist the right to peace as a basic human right, and demand the Colombian State the fulfilment of the Peace Agreement signed with FARC-EP.
- Safeguard Latin America as a region of peace.

Because we are sure other world is possible, more just and free, more caring, harmonious and kind, a world worthy of being livable. We embrace dreams, we embrace the Peace Agreements.
